Alright Folks, I am spreading the words out now - URI - The Surgical Strike is the Best and Smartest War Movie ever made in our country. Practically and Strictly made for urban audiences, this film marks a historical turn around for Indian film making.. Those frequent Hand-held Camera Movements, those never before seen Visual effects with long range Sniper Attacks or tactically placing Drones and above all, no unnecessary Emotional Drama but Superfast-paced Cold Blooded and Gripping War flick..!!

I would say two names - Vicky Kaushal who will surely find his Stardom with this one and Aditya Dhar, the Debutant Director is a volcano of talent and his homework and research reflected totally on Silver-Screen..!! Salute to you..!!

And Lastly, I don't know how much the story is exaggerated or dramatized but one thing I would tell for sure that Indian Film-making's future is in safe hands and they will march ahead with their head held high far and far away..!!!

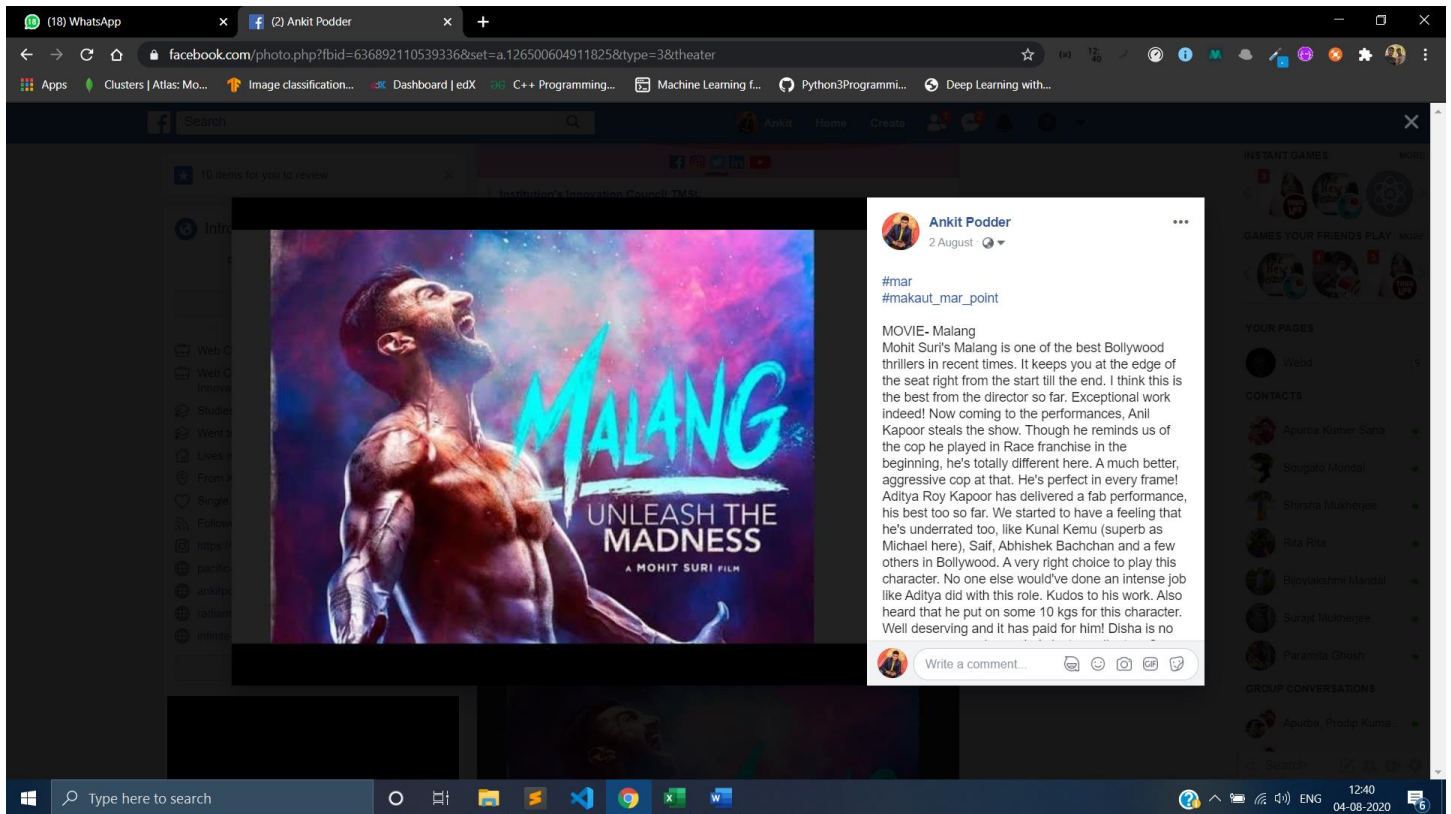

My Rating is 9/10 and only rating was cut cause I wanted a bit more from the supporting characters as this film was almost a One Man Show - Vicky Kaushal..!!!!
